## Protect yourself from unnecessary Public Liability claims

Recently a Rugby League club was fined \$195,000 following an armed robbery due to the "failure to provide a safe place of work for employees or adequate security infrastructure".

By installing adequate Duress Alarms, CCTV and DVR surveillance and robust back to base Monitoring solutions, a Hotelier is protecting themselves against the risk of public liability claims and also potentially reducing insurance premium costs.

Many insurance policies also require that your security system is serviced and maintained at least yearly.

When is the last time you had your security solution checked to make sure it was operating at optimal performance?

## Reduce the threat of Armed Hold Ups.

Robbery and Assault are unfortunately a common threat to Licensed Premises. CCTV and DVR Surveillance technologies act not only as a deterrent to would be criminals, they can also provide clear records should an incident occur.

Introducing enhanced security measures protects not only your profits, staff and patrons but also may protect the reputation of your business.

## Keep up with Changing Legislation

Hoteliers are required to comply with new legislation changes all the time. Smoking laws have recently meant new additions to pubs and clubs or layout changes resulting in a need for increased security or upgrades to existing security coverage.

Obligatory upgrades from Analog to Digital technology for CCTV and DVRs may come into affect in some regions soon. Your security partner should keep you abreast of changing legislation and be able to offer you cost effective solutions to remain compliant.

## You can run a new Signature Security system for as little as \$100/month.<sup>†</sup>

Once you have had your premises assessed by a Signature Security advisor, you'll have options. And we'll work with you to minimise the upfront costs, with a flexible leasing arrangement and payment plan. Switching to a Signature Security system has never been easier.

### Signature installs, monitors and maintains:

Alarm and Detection systems, with back-to-base facilities

Surveillance Technology, such as CCTV and Digital Video Recording

Vandalism and Theft Deterrents, such as smoke shields, and passive infrared detectors

Access Control Solutions, which allow you to decide who has access to what areas

Point of Sale security solutions to record and monitor all cash transactions

Panic Buttons and Duress Alarms to optimise staff safety

Smoke and thermal detectors

24/7 Alarm Response Centres, that meet the toughest industry regulations

Open and Close Reporting to track when and by whom your premises is opened and closed each day

Service Plans, to minimise running costs over the life of your security system

<sup>†</sup> Based on a basic security system leased over 36 months, with a \$400 deposit on equipment. Total cost: (36 months x \$100) + \$400 = \$4000
